

RHEIMS CATHEDRAL WILL BE REBUILT SOON

(Correspondence Associated Press)
PARIS, Aug. 6.—Suggestions are being publicly advanced as to the destiny of Rheims cathedral. Discussion centers on whether it should be restored as a cathedral, transformed into some sort of national memorial dedicated to those who have lost their lives in the war, or left as a monument to Teutonic barbarism. The suggestion cannot be definitely decided perhaps until the German guns have been driven from Fort Brimont and the final condition of the historic town, after so many months of bombardment, can be ascertained. Meanwhile Cardinal Luçon, archbishop of Rheims, who has remained beside his beloved cathedral through-

out the bombardment, is firmly determined that Rheims shall always have its temple. "We shall repair the cathedral," he has said. "It must be so. We have casts of its statues, and colored photographs of its glass. Our architect, at risk of his life, is working under the damaged arches to save what can be moved. "The day will come when the doors will again be opened for religious services, for I hold fast to one thing above all, that the cathedral where the first Christian king of France was christened shall remain the first church of France. "I protest with all my energy, and I shall never cease protesting, against any project that seeks to make

Rheims cathedral into some kind of a museum or necropolis. Those who have such ideas do not consider what Rheims is for the church, for France, and for the whole world. All such proposals are impossible. "With one suggestion only, that has been made, can I associate myself with all my heart. Let there be every year, a solemn celebration in the cathedral which has suffered so from German rage, in memory of those who have died for the safety of the country and the freedom of the world. The whole Catholic world would join to found such a perpetual mass, and I hope that God will spare me to celebrate it myself for the first time."

WAR CREDITS BILL PASSES HOUSE PROVIDES OVER ELEVEN BILLIONS

(By Associated Press.)
WASHINGTON, Sept. 7.—The war credits bill authorizing \$11,538,945,460 in bonds and certificates passed the house last night unanimously. Action by the senate as soon as the pending war tax bill is disposed of is planned by administration leaders. Not a material amendment was added to the bill by the house. Representative Moore of Pennsylvania led a group of Republicans in a futile fight for consideration of his proposal for a war expenditure committee, which was thrown out on a point of order. Every effort of Republicans to limit the control the bill would give Secretary McAdoo over the bonds and certificates resulted in failure. The last fight, made by Representative Johnson of Washington, to direct the secretary to spend at least \$2,500,000 for newspaper advertising in disposing of the bonds was defeated overwhelmingly. If the secretary de-

sires, under the measure, he may use some of the \$17,600,000 appropriated for disposing of all the bonds and certificates in newspaper publicity. Representative Cannon of Illinois managed to obtain the adoption of a compromise amendment to exempt from taxation forever interest on bonds not in excess of \$5000. He wanted to make it \$10,000 but Democratic Leader Kitchin would not agree to that. The bill authorizes the issuance of \$7,538,945,460 worth of convertible 4 per cent bonds, subject to supertaxes and war profits taxes, and to terminate at the discretion of the secretary of the treasury. Of this total \$4,000,000,000 worth is for a new alloted loan; \$3,000,000,000 worth to take over a three and a half per cent issue already authorized and the remaining \$538,945,460 to be used for converting certain outstanding bonds, including the Danish West Indies,

Alaskan railway, Panama canal and naval construction issues. Issuance also is authorized of not more than \$2,000,000,000 worth each of certificates of indebtedness and war savings certificates to run not more than one year and five years, respectively, at rates of interest to be fixed by the secretary of the treasury. These issues are to be subject to the same taxes as the bonds. The bill provides that foreign bonds, taken in exchange for loans shall not be sold at less than the purchase price. For more than an hour debate veered from the bill itself to the general war financing situation. Speaker Clark and Representative Sherley of Kentucky urging that more taxes should be levied soon and declaring grave dangers lay ahead if congress continues to issue vast quantities of bonds without regard to equalization by taxes.

GERMAN AIR SERVICE GREATLY AUGMENTED

(Correspondence Associated Press)
PARIS, August 9.—The entrance of America into the war and the probability that it soon would be leading the allies tremendous aid in the aerial department of the struggle has led Germany to reorganize and strengthen its own aviation branches materially, according to The Temps. This reorganization does not date exclusively from the break with the United States, but rather from the battle of the Somme, but it has been accelerated and intensified by the reports that hundreds if not thousands of airplanes with the corresponding aviators to man them are soon to be supplied the entente forces. Recently captured prisoners say that a recently constructed biplane of the Albatross type is vastly superior to anything heretofore used by these squadrons. It is equipped with a 250 h. p. motor and attains a speed of from 100 to 115 miles an hour. It can rise to an altitude of more than 2000 yards in nine minutes

and carries two machine guns. The machines travel in groups of six or eight. There are from forty to fifty machines in each squadron, which when complete and ready for action is divided into four or five sections. Each airplane is armed with two machine guns and each carries bombs weighing from 20 to 100 pounds apiece. Some are said to carry bombs, that weigh more than 200 pounds. While perfecting their service in the air, the Germans have also rapidly bettered their anti aircraft measures and weapons. The 77 millimeter guns have given way to rapid firing guns of 105 millimeter calibre, and at certain points along the front they use shrapnel guns of 240 millimeter size. They possess special bullets for the destruction of captive balloons, but in many instances have used them with great cruelty against opponents in airplanes. At least one squadron captain, a Lieutenant Eilers, finally forbade his men to carry these bullets

with them unless they were definitely charged with raiding balloons. The Germans, it is said, are constantly putting new types of machines into the field. The famous Taube went out of style long ago, and it has now been followed by the even more famous Fokker, which less than a year ago was considered the last and final word in attacking airplanes. Its inventor, a Dutchman, is now said to be devoting himself to the perfection of a machine with a 260 h. p. motor which will break all records for speed and efficiency. Today the Rumpler seems to be the favorite machine, though those with 160 h. p. motors are not fast enough to suit, and yet the machines will hardly stand up under a heavier motor. The raids on London were accomplished with Gotha machines, but these, though so recent that little is known about them in France, are already giving way to faster airplanes, especially to powerful Rumpler biplanes which have tremendous speed and rising power. These machines of which there are not fewer than 30 in the battle flotilla, can make great distances both because of their powerful motors and because of their huge gasoline tanks, two of which with a capacity apiece of 380 liters (120 gallons) are carried on each machine.

WOMEN ORGANIZE FIRE DEPARTMENT

(By Associated Press.)
EDGEWATER, Colo., Sept. 7.—When the fire bell rings in Edgewater these days, the baby is turned over to a neighbor for safe keeping, the bread is snatched from the oven, sewing is left where it falls and the firewomen run for their apparatus. In Edgewater, the women "man" the hose reels and climb the ladders. The reason is that many of the regular firemen, all of whom are volunteers, are in training at national army encampments, national guard training camps, or elsewhere in the service of the government. The women decided that it was their duty to see that insurance rates did not increase. They drafted all female relatives of the firemen into their general department, to answer alarms when needed, and the wives of the firemen formed a special particular band of "fire ladies" to do the work.

SCHOONER LOAD OF FINE TOBACCO

(By Associated Press.)
AN ATLANTIC PORT, Sept. 7.—Virginia tobacco for the American soldiers abroad will fill the holds of a four masted schooner that sailed from here today for another port to take aboard its cargo. Smoking and chewing tobacco will be included in the shipment, which, it is said, will be the largest of the kind ever sent from the United States to France. Subscribe for the Bonanza. their husbands were not there to do. So far they have answered four alarms and have made quick time reaching the scene of the fire in each case. Observers say they have proved that the female of the fire fighting species is just as deadly and much more graceful than the male. The Bonanza publishes full telegraph reports. Subscribe for it.

GREATEST CRATER ON GLOBE IN THE HEART OF ALASKA

(By Associated Press.)
WASHINGTON, Sept. 7.—Safe return to civilization, after a successful tour of the "Valley of Ten Thousand Smokes" of the National Geographic Society's Mount Katmai expedition was announced yesterday in a telegram to the society's headquarters here from Robert F. Griggs, head of the expedition, now at Kodiak, Alaska. Dr. Griggs' message declares that in the light of the expedition's discoveries the valley will stand as the first wonder of the world. Instead of "ten thousand smokes," as the vast volcanic area in Alaska is now known, the valley is said to have literally millions of active vents in a

space of a hundred square miles. The survey of the exploration party proves, according to the message, that Katmai is the greatest crater on the face of the globe, being more than nine miles in circumference and 3600 feet deep. The party also discovered a mud river 17 miles long, and mapped 1600 miles of territory hitherto uncharted. Two thousand photographs of the great volcano and the contiguous territory were secured and a complete collection of plants, insects, birds and geological data is being brought back to the United States. Gases from the vents are also being brought back for chemical analysis.

The expedition, which expected to be back in Washington about October fifth, set sail for the Mount Katmai region from Seattle on May 28th. Prior to the great Katmai eruption of June, 1912, practically nothing was known of this great Alaskan volcanic area. The explosion of that year was one of the most terrific in the history of the world. The quantity of material thrown from the Katmai crater was vastly greater than that which resulted in the projection of the Island of Krakatoa out of the bed of the Pacific ocean.

The Kite must have just enough tail to fly—no more

MAN must have just enough food to be healthy—too much makes him ill—too little starves him. When men go to extremes they always go wrong. The balanced man does not believe in too much or too little of anything.

For 60 years BUDWEISER—an honest brew of Barley-Malt and Saazer Hops—has made for true temperance. When rationally used this mild beverage imparts a kindly humanity, and its wholesome juices benefit the entire body. BUDWEISER sales exceed other beers by millions of bottles.
